

# The Xemplar Wage Report

2020 | SALT LAKE CITY

## CURRENT TRADESMEN WAGES

Adam Himoff  
President/CEO

### INTRODUCTION

Welcome to our annual report on Salt Lake City tradesmen wages. We have established this report for two reasons: 1) Our clients have asked us to make our wage data public in an anonymous form so they can better review and set tradesmen wages. 2) While some job boards post average tradesmen wages for a region, there is no source for wage data that is matched with specific years of experience.

### TRENDS

2020 brought hiring extremes in the face of the COVID pandemic. In some cases, companies halted hiring of tradespeople. In others, sometimes due to the impact of the virus or the nature of their industries, companies found themselves desperately in need of workers. In general, candidates reported making every effort to stay in their current positions when possible.

Average tradesmen wages in Salt Lake City are based on 875 data points during the period of 1/1/20 to 12/31/20.

**METHODOLOGY** Xemplar wage metrics are proprietary and sourced solely from client job orders and placements. Job orders with wage ranges are converted into multiple linear wage data points, assuming that low-end-of-range wages are earned on minimum years of experience and high-end-of-range wages are earned four years from the minimum. Position data are filtered into averages for each year of experience. Years without three or more relevant data points are excluded or, in some cases, an average of prior and following year wages is used. Position categories without sufficient data are excluded and may appear in future reports.
